Chip,  
Here's that e-mail string re: Sandy's request. As I said, I'll call her & let her know I'm working on it from my end & you're doing the same. See you tonite  
Jim

Nope – this is different from the list you mention.

My request has to do with obtaining more data from existing Portland Harbor projects – in this case dredging projects – so that we can upload the data into our Existing database. So far, I've hit a wall with the Portland District. I'm looking for recent data only because we made a sweep of dredging data at the beginning of the project.

If you can get your hands on any new dredging project data in the harbor, I would be thrilled. It's good data and would lend itself nicely to the RI report.

Sandy

Sandy,  
We had a PH Mgr mtg this morning & we discussed what your request **may** be related too. EPA/partners had asked Gene R (b) (6) to provide a concise list of the RD3B work & lamprey tox testing completed. This list was to support the LWG's request to EPA for EPA to prepare a "comfort letter" to the LWG saying the field work for RD3B was now successfully completed. If this is why you're asking for the non-LWG data, I don't think non-LWG data are necessary for that list. If this isn't the reason you're asking for my help, reply or call me & I'll see what I can do. I have a mtg with the Corps Tues 2/5, so let me know.

**Subject:** Non-LWG Dredging Data in Portland Harbor

Hi Jim. I've run up against a wall and I'm wondering if you can help me. I've requested non-LWG data related to in-harbor dredging projects from the Portland District. They said I had to FOIA the data for me and that it would be a fast process. Unfortunately, I need it fast or it won't

make it into the RI report. I requested this data months ago and just now received word about the need for a FOIA. If DEQ does not have the data, which I think we confirmed via e-mail last fall, is there a faster way for the state to obtain the data? If not, I will go to Eric to see what he can do.

Sites that probably have dredging data – Glacier NW, Fred's Marina, possibly something new at Cargill, Ash Grove Cement, JR Simplot and possibly Goldendale. We have the last Schnitzer characterization data in our system already.

Any help is appreciated.

Sandy
